

ENVIRONMENTAL PLANNING

Nor-Alta Environmental Services Ltd. has the experience and expertise to effectively plan, acquire the required permits /approvals and manage your project. Our team is trained in multiple fields allowing them to “see the big picture” and perform cross-functional tasks without the need to dispatch additional personnel. Utilizing key environmental personnel with training, experience and knowledge of the entire scope of work provides our clients with efficiency and cost-savings.

Our team of professionals includes Agrologists, Biologists, Chemists, hydrogeologists, and engineers, working together to provide a wide range of environmental consulting services available throughout Western Canada.

Nor-Alta Environmental Services Ltd. will guide you through every step of the environmental approval and permitting process for your oil and gas, resource, or utility project. We will help acquire provincial, federal and third party stakeholder approval, complete Wetland Assessments and Impact Reports, environmental mitigation plans, and conduct environmental monitoring to get your project built in a cost effective and environmentally friendly manner. We have multiple offices throughout Alberta that allow our team to mobilize quickly and efficiently. Our team is trained with the knowledge and expertise required to manage all types of oil and gas, resource, or utility projects.
